Career-Ready Skills in Leadership, Tech, & Analytics

The Master of Business Administration (MBA) – Information Technology at Florida Coastal University is an industry-relevant program designed to develop future-ready IT and technology management professionals. It blends advanced business knowledge with practical applications to prepare students for today's rapidly evolving, technology-driven global business environment.

Focused on IT strategy, digital innovation, data-driven decision-making, and systems integration, the IT specialization equips students to align technology with business objectives, manage digital transformation initiatives, and lead tech-enabled growth. Graduates are prepared to lead in IT project management, business analytics, technology consulting, and entrepreneurial ventures with confidence and integrity.

### Program Overview

The Master of Business Administration (MBA) - IT program is structured as a 36-credit hour fully online degree that strengthens core business acumen while advancing expertise in information technology and digital transformation.

It is designed to develop a multidimensional understanding of technology-driven business management, from IT strategy and systems integration to cybersecurity, data analytics, and emerging technologies. Students gain real-world experience through technology projects, digital business simulations, and interactive coursework - all delivered via a flexible, student-focused online platform.

The program includes:

- 24 credit hours of core business courses
- 9 credit hours in a information technology specialization
- 3-credit Capstone Project

### Why choose this program?

- Focused on real-world IT and digital skills like systems management, technology strategy, and business analytics
- Combines advanced business knowledge with hands-on IT and digital management training
- Includes simulations, case studies, and capstone projects for practical learning
- Prepares you for analytical and leadership roles in IT project management, business analytics, and digital strategy
- Builds leadership, decision-making, and analytical capabilities tailored to the IT and technology management sector
